

You can use the WMI Explorer tool, created by Microsoft Employee Vinay. You can download the Tool from Vinay

Pamnani: <https://github.com/vinaypamnani/wmie2/releases>.

- Launch the WMI Explorer tool
- Connect to the location device by just clicking on the **Connect** button.
- Click on **Root\CIMV2** namespace.
- Click on the **EXECUTE** button at the bottom right screen to launch the WMI query search window.
- In the search box, enter the following query -> **Output view -> List View**.
- Click on the **Execute** button to get the results (Windows 11 product key).
